Assistant Superintendent
of
Public Instruction

Dedication

Marian LaQuitte

Robert C. Moss

TO MARIAN LAQUITTE AND ROBERT MOSS -

You listened to our complaints with open minds, understood our problems, assisted us with tireless patience, encouraged us when we were disheartened, inspired us with confidence, and respected our chance for success.

We shall always be grateful for your wisdom, your experience, and your determination to make us satisfied and happy. To show how much we honor and respect your valuable guidance, we dedicate this memory book to you -

OUR DEANS

~From Our Principal ~

When you see a jet stream floating idly in a sunny sky or think about a man-made missle orbiting around our earth, does it thrill you just a little bit as it does me?

Sometimes I am forced to marvel when I realize that there are so many smart men and women in the world today - people who can tell what the position of the moon will be next week in relation to the earth; people who can take television pictures of the moon and relay them back to earth one hundred million miles away; people who can calculate space, distance, light, and sound.

Who are these brilliant scientists and mathematicians? They are individuals just like your mother and your dad, just like your neighbor or your teacher, people who only fifteen or twenty years ago were junior high school students like yourselves.

You can be these same people of tomorrow if you wish. They never took the easy way out. They studied; they did more than was asked of them; they sacrificed play for work and fun for knowledge.

Here at Conniston we try to provide you with the tools to turn grey matter into a thinking brain. We provide the basic courses that will allow you to go on in fields of study so necessary for the continued progress of the future.

Won't you use your God given strength and facilities to develop yourselves into the smart people of tomorrow?

Constance Morse
and
Happy
